\*Calls are free for BT customers within inclusive calling plans. Call charges from other providers may vary. The standard business hours for Digital UK's contact centre are 9am to 7pm Monday to Friday and 10am to 4pm on a Saturday. Opening hours will be extended during switchover in each area.

## How will the digital TV switchover affect my recording equipment?

# How will the digital TV switchover affect my recording equipment?

Video and analogue DVD recorders will still play back and record, but you won't be able to record one channel while you watch another. If you want to continue doing this after switchover, the simplest way is to get a digital TV recorder.

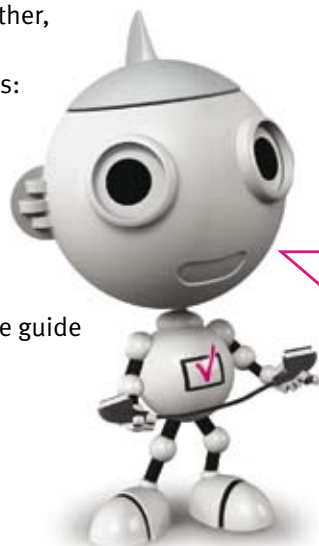

There are three types of digital TV recorders:

- A recorder that records onto a hard drive
- A recorder that records onto a DVD
- A recorder that allows you to do both

## What are the main benefits of getting a hard drive digital TV recorder?

In addition to being able to watch one channel whilst recording another, upgrading to a digital TV recorder will give you the following benefits:

- Record at the touch of a button, no tapes or timers required
- Pause and rewind live TV
- Record a whole series at once
- On-screen electronic programme guide

**You will need a scart lead for every piece of equipment you attach to your TV.**

## What to buy?

If you have an analogue TV, consider getting a digital TV recorder with a 'twin tuner' – **it will also convert your TV.**

Look at the options in the table opposite to compare hard drive digital TV recorders. Alternatively, ask your local electrical retailer about which kind of digital TV recorder is best for you.

Look for the 'digital tick' logo (below). It means the product is designed to continue working after switchover.
